

3. PYTHON PROGRAMMING FOR BEGINNERS

Duration: 2 Months | Classes: 48 | Frequency: 6 Classes/Week | Class Duration: 60–75 Minutes

MONTH 1: PYTHON FOUNDATIONS

- Day 1: Introduction to programming and Python
- Day 2: Installing/running Python
- Day 3: Variables
- Day 4: Data types
- Day 5: Input/output
- Day 6: Operators
- Day 7: Revision and practical
- Day 8: Conditional statements
- Day 9: if/elif/else practical
- Day 10: Nested conditions
- Day 11: Introduction to loops
- Day 12: For loops
- Day 13: While loops
- Day 14: Loop practice
- Day 15: Strings introduction
- Day 16: String operations
- Day 17: Lists
- Day 18: List methods
- Day 19: Tuples
- Day 20: Sets
- Day 21: Revision
- Day 22: Dictionaries
- Day 23: Dictionary operations
- Day 24: Functions introduction
- Day 25: Function arguments
- Day 26: Return values
- Day 27: Scope basics
- Day 28: Practical test

MONTH 2: PRACTICAL PYTHON

- Day 29: Modules
- Day 30: Built-in modules
- Day 31: File handling
- Day 32: Reading files
- Day 33: Writing files
- Day 34: Exception handling
- Day 35: Revision
- Day 36: Object-oriented programming introduction
- Day 37: Classes and objects
- Day 38: Constructors
- Day 39: Inheritance basics
- Day 40: OOP practice

PROJECT WEEK

- Day 41: Project planning
- Day 42: Number guessing/game project
- Day 43: Student marks project
- Day 44: Simple calculator project
- Day 45: File-based project
- Day 46: Final project development
- Day 47: Project presentation
- Day 48: Final assessment
